Company Profile

1960-2026

HOVAG

SINCE

1960

ELECTRICAL ENGINEERING
PRODUCTS & SOLUTIONS

About us

Hovag is a company specialized in Trading and diversified engineering business. Its business segments comprise of:

Trading enterprises

Electric power systems & Automation

Lighting & home automation

With more than 65 years of experience, Hovag is providing the Syrian Market with unique range of electrical supplies from international brands, embedding these supplies to form excellent combination for providing projects with engineering solutions and systems for reliable electrical power distribution and automation that extend from "High - Medium & Low Voltage systems down to socket outlets in buildings"

Light is Life

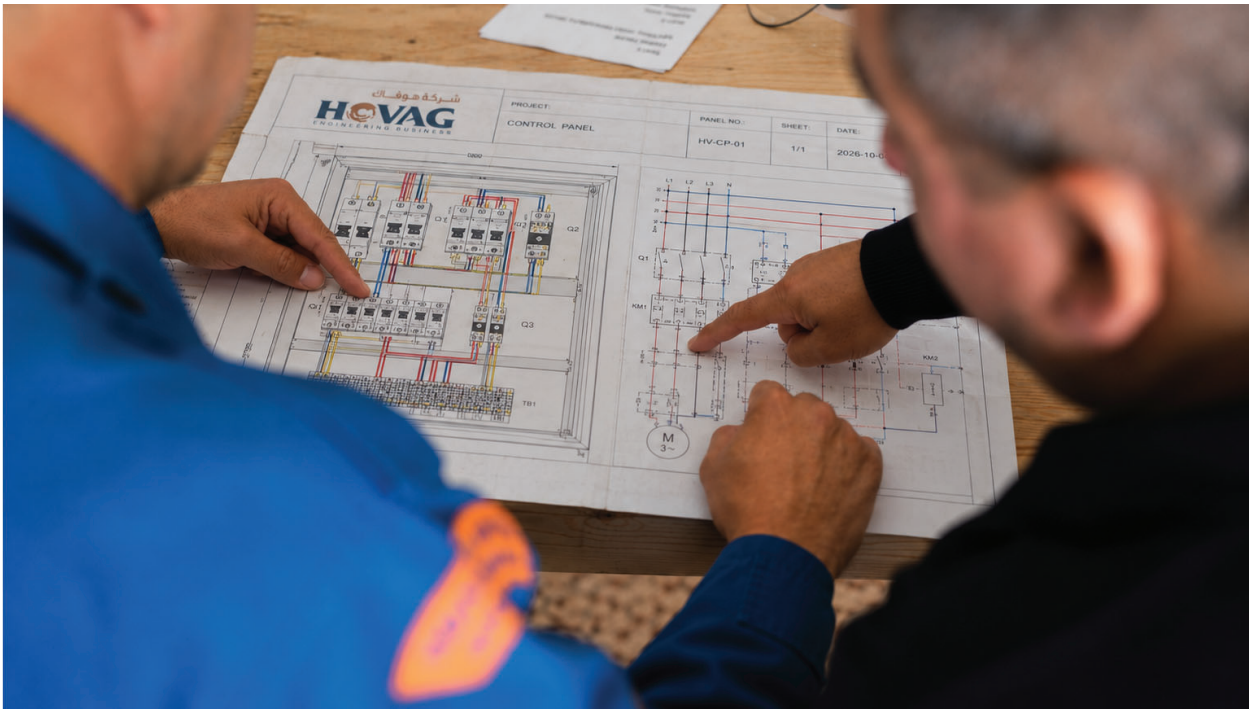

Hovag is a leading supplier of integral lighting solutions for professional indoor and outdoor lighting applications that extremely meet the lighting ergonomic requirements. Our prestigious showrooms in the country under brand name of Arteluce exhibit and distribute high end illumination products from various international brands and suppliers.

Our Mission

The challenges imposed by the rapid-paced changes of the world lead us to formulate a clear strategy: building a solid partnership with our customers founded on a long-term commitment to keep up to growth and technological development.

Our activities will remain firmly focused on the premium services in our market segments. Our mission is clearly defined to be leading provider of premium products, comprehensive solutions and systems integrating the best possible combination options in projects for: Power Distribution, Automation, Lighting and Home Automation.

Our business principles

Our strength to succeed lies in our commitment to our business principles

Customer Orientation

The customer is the center of our interests. We act as a partner with our customers to provide products and services to improve their business operation and performance.
We conduct trainings, seminars and translations of technical literature to enhance and spread technical knowledge.

Market Orientation

We strive to transfer to our market sectors the latest innovation and technologies that contributes to the development of the economy and people.

Ethics

Commitment to ethical business behavior of our employee contributes to our company image.

Employee Orientation

We invest in our employees and create a work environment that enables them to achieve high performance and excellent results.

Behave Responsibly

We adhere to our principles to build and maintain trust to each other for better progress with transparency and accountability.

Business Divisions

Hovag Business is based on three divisional structure

Electrical Sourcing & Supply:

A leading distribution entity for supplying the Syrian market with electrical products and solutions.

Systems & Solutions:

A comprehensive portfolio for High-Medium & low voltage applications covering whole spectrum of Systems & Solutions for efficient power distribution and automation.

Lighting & Home Automation:

This division is dedicated for supplying the market and projects with integral lighting solution, illumination products, home automation, socket and switches.

ELECTRICAL SOURCING & SUPPLY DIVISION

Electrical Sourcing & Supply Division

premium products for sustainable function

Since its foundation in 1960 Hovag is distributing and providing the Syrian market with broad range of electrical products and solution from many international brands and suppliers. we strive always to keep pace with market trends , introduce new standards products and technologies to be always close to our customers and present in all electrical market sectors .

In order to better meet the need of our customers we develop our distribution networks, positioning our sales force and optimizing our logistics to reduce delivery times.

Sales Network

Through our main branches in Damascus and Aleppo and our large distribution network spread all over Syria, Hovag is a preferred partner for all market sectors and professional customers to offer a unique range of electrical supplies.

Market Sectors & Customers

Hovag offers its expertise and products in the key market: And it supplies products to diversified customers wholesalers, retailers, electricians, contractors, panel builders,OEMs, key accounts and governmental service companies.

Industrial market

Residential market

Commercial market

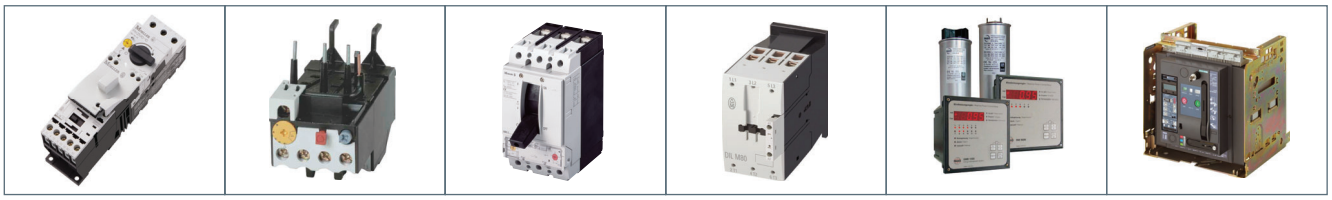

Products & Brands

Hovag provides wide range of quality products from famous international manufactures to meet the customers needs and keep pace with market standards and requirements. Hand by hand with giant Eaton/ Moeller, we have created an alliance since 1968 and still continues for the purpose of offering every new invention in the electrical market.

Products Families

Low Voltage Switchgears: circuit breakers, motor starters, contactors, switching, protection components and capacitor banks.

Products for building automation: MCBs, devices for protecting persons and electrical equipment, Automation electrical building functions.

Automation products: controlling and visualization products, variable speed drives and soft starters.

Electric measuring and control equipments, measuring devices, control equipments Wiring devices.

Brands

Advanced Logistics for punctual delivery

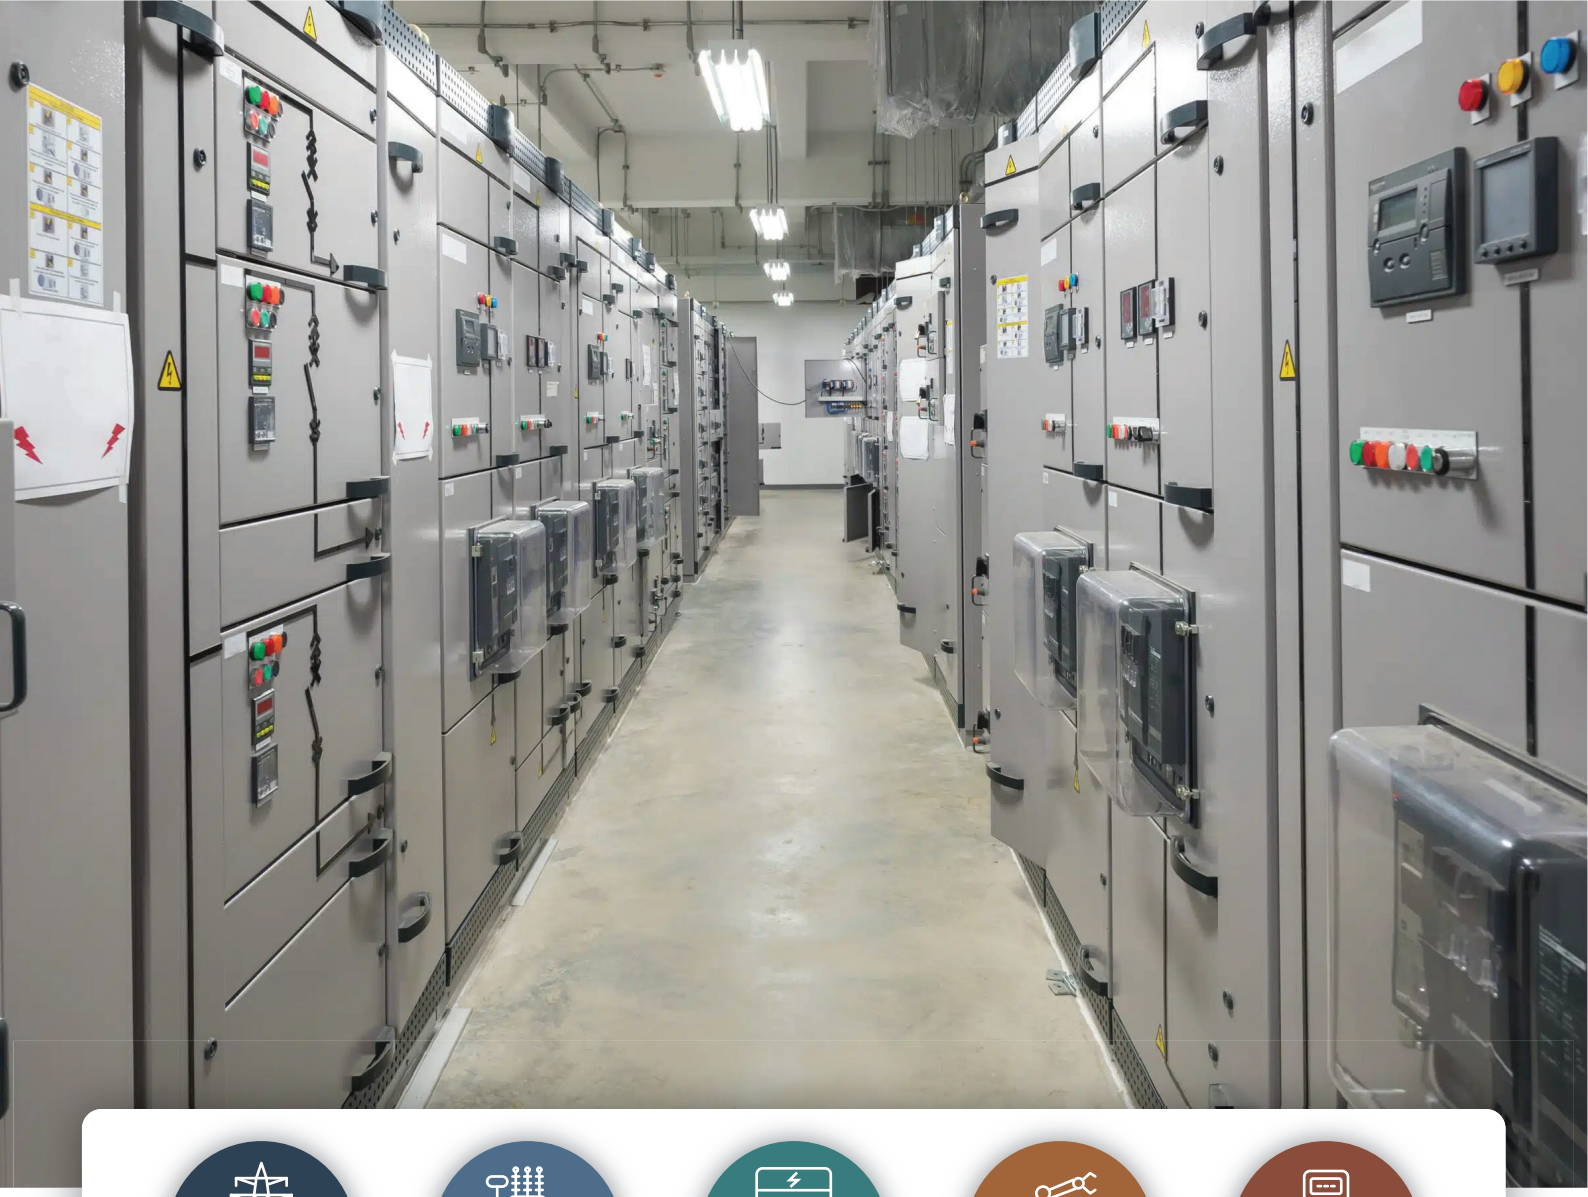

Because electrical products need to be delivered every day to customers, we manage our inventory and stock in big quantities and varieties of products "ready on shelves" to fulfill our customers deliveries in a very short time. Thanks to our motivated procurement and logistics team to make their utmost to meet our commitments to customers.

Our Customers - Our Values

Hovag works in close cooperation with its customers whether through our direct contacts or from our sales outlets we provide technical expertise, sales support services and solutions to satisfy our customers and earn loyalty.
Our customers consider Hovag as the local place for obtaining technical information and advice. With our expert staff they can save time to pick up contemporary products, solutions and knowledge.

- We understand customer needs as we listen closely to their requirements.
- Wide range of products presence and availability.
- Expert team ready for sales advice and after sales service.
- Always attentive to offer latest innovative products and solutions.

HOVAG DIVISION 02

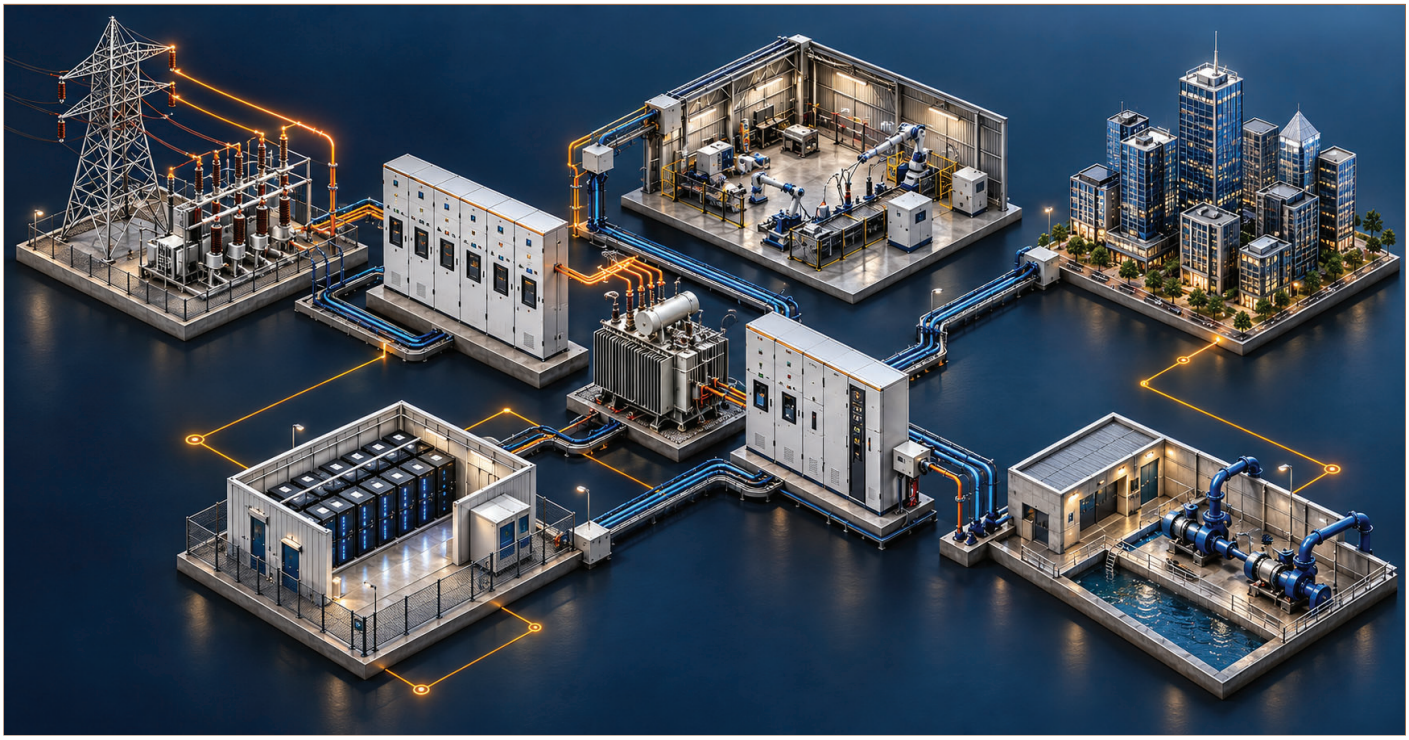

ELECTRICAL SYSTEMS & SOLUTIONS DIVISION

Systems & Solutions

At Hovag, we are committed to handling power in a creative way. We give power form, function and direction while maximizing its productivity.

This has been the key focus of our company since its foundation in 1960
Today Hovag is one of the leading suppliers in the Syrian market for systems of power distribution and automation that allow us to provide effective and customized solution systems for all industrial, commercial and building applications.

Optimm quality for maximum efficiancy

Hovag is a single source Systems & solutions provider for:

- High & medium voltage substation projects
- Medium voltage primary and secondary AIS (air-insulated) or GIS (gas-insulated) switchgear and components
- Low voltage switchgear for reliable power distribution and protection
- Automation design & solutions for production plants and process
- UPS & Backup Power Solutions

Systems & Solutions

Without compromises

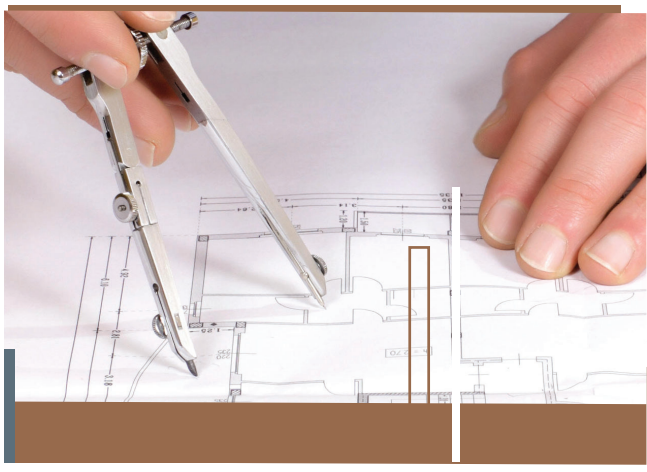

Our many decades of experience have provided us with confidence to hamdle the entire management of your projects, taking care of important factors such as quality time and costs-comprehensively, responsibly and without any compromises.
New requirements call for new solutions and we believe that we can deliver optimum technical results and economical solutions that guarantee high standards of safety, reliability and serviceability.

A partner you can rely on

Demanding tasks require capable partners, and you can find those partners among our own experienced staff as well as among our strategic and system partners who support us with products and knowledge.
We are always ready to take new challenges.
Our team in the Division make use of proven engineering procedures and software tools to ensure offering new ideas to make power distribution and automation more effective and reliable.

You can be sure that our solution portfolio for your projects will always incorporate the latest technological developments that provide optimum benefit and use.

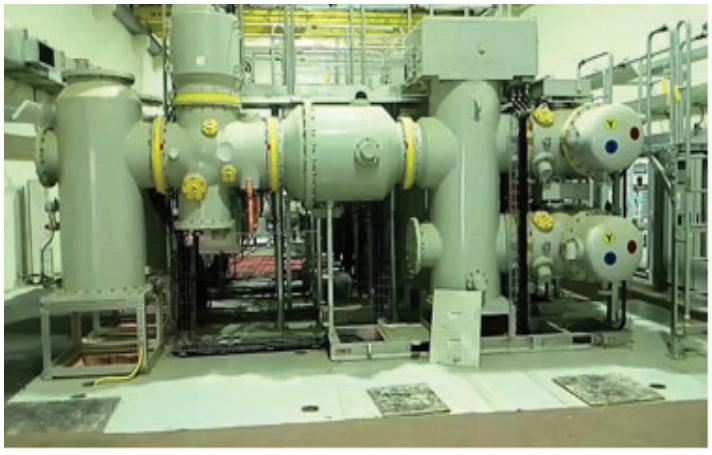

High & Medium Voltage Substations

A Substation or Switchyard is a part of an Electrical Protection & Distribution system and are the nodes of today's complex power transmission networks. They perform various tasks that are crucial to the smooth operation of our grid. Their main tasks include switching power lines ON and Off and transforming electrical energy from one voltage level to another.

Solutions & Services

To play a key role in meeting the demand of supplying safely, efficient and reliable substations, Hovag is offering and constructing various substation systems, including air (AIS) and gas (GIS) insulated systems, and modular substations required by utility solutions, residential, commercial and industrial consumers.

Systems & Solutions

For High & medium voltage substations, Hovag as a local contractor with experience and capabilities supports its client throughout offering Turn-key substation projects. Covering all steps of project development and ensure constructing and implementing of procurement, civil works, precise installation, electrification, testing and commissioning up to start-up.

Substation Components

Substations contain a variety of essential components that facilitate the transmission and distribution of electrical power. Through our projects we have developed tight relationship with top brands manufacturers of electrical substation equipment that guarantees a perfect fit between the needs and the solution provided by our highly skilled teams of engineers. Whether it includes transformers, circuit breakers, isolators, lightning arresters, current and voltage transformers, protection and control systems, we select optimum quality products with cost-efficient solutions that are key to the reliable operation of any system.

Systems & Solutions

Services we provide

- Turnkey projects AIS / GIS Substations
- Development of control and protection projects
- Supply of strategic materials
- Electromechanical assembly
- Functional tests and start up
- Civil engineering, control buildings, accessories
- Maintenance and operation of substations

Medium & Low Voltage Systems

From transformers - Medium&Low voltage systems to the socket: Hovag offers "single - sourced" holistic solutions for switching and protecting commanding and controlling, signaling and visualization in industrial parts and buildings.

Medium Voltage Systems:

Hovag supplies medium voltage solutions that connect and protect the electrical networks, enabling the reliable integration of power sources into the grid, ensuring continuous power delivery to industries, commercial facilities, and residential areas.

We offer from various manufacturers safe and reliable medium voltage switchgear and components conforming to the latest IEC standards. Our switchgear offerings can be used within a wide range of primary and secondary applications in: Power stations, Oil and gas industry, Cement & steel industry, pumping stations and Potential applications for secondary energy distribution.

We provide efficient energy solutions, delivering value to our clients:

- Dry Type transformers
- Medium Voltage Primary AIS / GIS switchgear
- Medium Voltage secondary switchgear (RMU)
- MV circuit breakers and components
- Digital protection relays and controls
- MV Drives & Softstarters

Dry Type Transformers

MV Primary switchgear

MV Secondary switchgear

MV Circuit breakers

MV Protection Relays

MV Drives & Soft Starters

Systems & Solutions

Low Voltage Systems:

Hovag supplies complete low voltage solutions built with components from leading manufacturers and conforming to IEC 61439 standard.

Our systems ensure safe, efficient and reliable power distribution across a wide range of sectors, including industrial plants, commercial and residential buildings, hospitals, hotels, water and pumping stations, data centers, and infrastructure projects.

Our Scope of Supply in Low Voltage Systems:

- Automatic transfer switches
- Low Voltage Main distribution boards
- Low Voltage sub main distribution
- Consumer distribution boards
- Motor control center
- Control gear
- Power factor correction panels
- Busbar Trunking System

Low voltage
power distribution system

Wiring devices

Automation Design & Solutions:

HOVAG provides integrated industrial automation solutions, including PLCs, variable frequency drives, soft starters, and motion control systems from leading manufacturers such as SIEMENS, EATON, OMRON, and INOVANCE.

Our solutions serve diverse sectors, including water treatment, manufacturing, and industrial processing, enhancing productivity, reliability, energy efficiency, and operational flexibility.

Our technical team supports system design, product selection, programming, and process optimization.

Systems & Solutions

Services

As a part of our daily cooperation with our customers, we have a service team that take care of all service and maintenance operations.
With short notice we can support our customers with all kind of panel related services - break down, rebuilding, extension, commissioning and start up.
Our service engineers have many years of experience with panel systems and are ready to help at any time.

Technical Highlights

Our offered Low voltage switchgear assembly systems are designed and verified according to IEC 61439 and have very robust construction whether are used in industrial or infrastructure application, a safe and reliable power supply is guaranteed in projects.
The flexibility of the system, its safety and efficiency help to noticeably reduce investment cost and risks, and guarantee maximum convenience and system availability throughout the entire period of use.

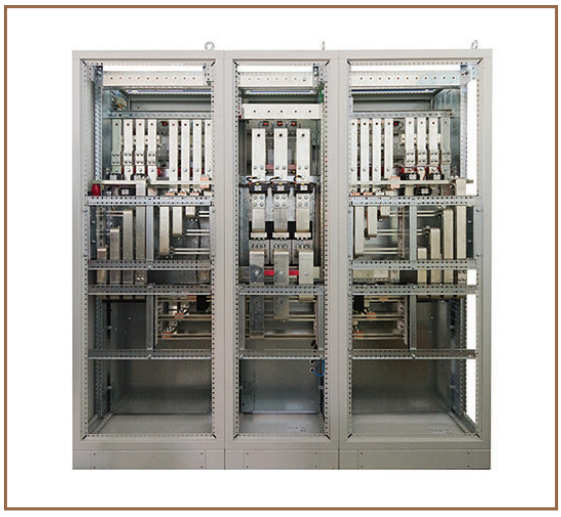

Systems & Solutions

Modular design & Robust constructed structural parts

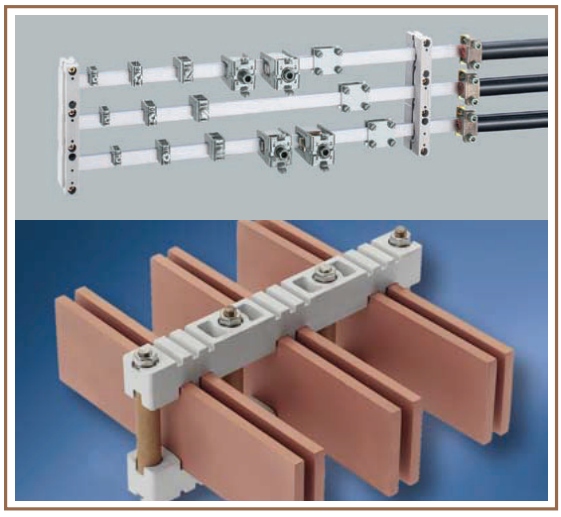

Generous space for cable incoming facilitate for connecting numerous and large cables

Busbar System

The heart of the Low Voltage Panel is the Busbar system. It connects the main busbar to dropper bars and to the circuit breakers. Thus, it is essential that this system must be reliable, rigid, and tested conforming to the temperature rise, short circuit test and other conditions.

Accessories

We use complete range of high quality accessories from European manufacturers for Low Voltage electrical panel board assembling. .
The ample range of accessories (Flexible Bars - Busbar Holders - Busbar Clamps-terminals) complies with the latest IEC standards and the relevant guidelines of safety and sustainability.

Optimum quality for maximum efficiancy

Systems & Solutions

UPS & Backup Power Solutions

Hovag is one of the leading suppliers in the Syrian market for providing full range of protection against all power failures.

Our portfolio encompasses a comprehensive range of offering uninterruptable power supplies (UPS's) and DC power solution covering applications for:

- Hospitals & Healthcare
- Computer rooms through large data centers
- Industrial Plants
- Telecom Services
- Banking & Finance Application
- Offices and Utilities

UPS Power Ratings

Helping you to maintain power continuity in projects and prevent downtime, Hovag offers high quality and comprehensive portfolio of UPS's from a few KW to MW and a wide range of supply voltages, protecting your entities from power failure threats and outages.

Our Portfolio Contains:

- Single Phase UPS's 600 VA up to 10 KVA
- Three Phase In-Single Phase out 10/15/20 KVA
- Three Phase 10 KVA up to 500 KVA
- Modular UPS's 10 KVA up to 600 KVA

Systems & Solutions

Our Partners

In order to meet our customers' needs and fulfill the highest standards in power back up systems with efficient solutions and best price.
We do work with well-known suppliers:

DELTA UPS Solutions
From 600 VA up tp 600 KVA

KEHUA UPS Solutions
From 1 KVA up tp 9.6 MVA

ABB UPS System
From 1 KVA up to 3 MVA

UPS and telecom batteries from leoch provide a key guarantee for high service life product performance and consistency

VRLA - AGM Batteries

Gel VRLA Batteries

Our Sales Philosophy:

To ensure the highest availability and faultless function of backup power in many enterprises-be they industrial plants, offices, healthcare or utilities, it is essential to make professional pre-engineering design and calculations to meet all the performance requirements. Our trained engineering sales team cooperate closely with customers and projects to offer the most advanced technologies from our product portfolio.

Our Sales Team Offers:

- Support of products presentation and knowledge
- Proven engineering procedures by advanced software tools
- Optimum technical and economical solutions to guarantee safety and serviceability
- Detailed technical and financial quotations

Systems & Solutions

Hours /Day, 365 days Services 24:

Offering high quality UPS from famous suppliers is only half of the way:
To guarantee your investment in UPS purchased products, your UPS must be correctly installed, commissioned and maintained.

This is why Hovag invests in its sales and service team by providing comprehensive technical trainings to offer its customers full range of services for the entire useful working life of UPS.

Our Services Include:

1) Installation and Commissioning
2) Routine maintenance inspections performed by our trained engineers to minimize the potential problems
3) Our service team will always actively manage your UPS diagnostics and reconditioning services
4) Will quickly and professionally respond to all emergency service calls
5) On-site and workshop repairs
6) Spare parts delivery and installation
7) Service agreements

Reference Projects:

- Bank Al-Baraka Headquarter 4 x 50 KVA
- Data Centre Bank Al-Baraka 3 x 50 KVA
- Al-Razi Hospital 80 KVA
- Qalamoon Hospital 2 x 120 KVA
- MRI Tartous Centre 120 KVA
- Al-Mouassat Hospital 100 KVA
- Batec Industrial Plant 2 x 30 KVA
- National Horms Hospital 120 KVA
- French Hospital in Damascus 160 KVA
- UNOPS for hospitals in Syria 2 x 120 KVA
- National Tartous Hospital 80 KVA

Lighting & Home Automation:

Hovag Lighting & Home Automation division is supplying the market with artistic collection of Luminaries and providing the projects with integral lighting solutions for professional interior and exterior lighting applications.

Thtough our decades of experience, we pursue a comprehensive approach to find the best design and passible solution for our customers, besides our endeavor to use tested products and innovations from international brands and suppliers.

Passion for Light

Having the right light settings is particularly important for any project whether it is an office, hotel, apartment or hospital; the light design has to fulfill the ergonomic requirements and standards. Therefore Hovag has developed experienced and trained engineering team to design innovative lighting solutions and concepts by arousing emotions and senses to make people feel good and show attractiveness of spaces and create lighting scenes to illuminate works of art.

We design Light

To achieve our mission in lighting design our team relies on a broad range of products portfolio from international brands such as Artemide, Reggiani, Ares, Phillips; as well as up-to-date engineering tools DIALux & 3DMAX using lighting technology know how along with the focus on application. We plan lighting professionally and with enthusiasm. Our range of services covers all fields of architecture indoors and outdoors from lighting homes to prestigious lighting for building and spaces.
Our philosophy in lighting design is to make people feel well, enjoy being in their spaces, activate and fascinate them, thereby facilitating a dialogue between architecture light and the environment.

Lighting & Home Automation:

Our range & services extends to

- Working in close partnership with architects
- Research projects and project owners
- Consulting & contracting companies

ArteLuce

Under this brand name, our showrooms in Damascus and Aleppo offer a complete range of residential,commercial high-end lighting products and wiring devices that can be seamlessly integrated in any apartments, offices, hotels or stores.
ArteLuce is dedicated to light and the customer.
The showrooms possess artistic products from various international brands that conform to the taste and customer demands.

Lighting & Home Automation:

Building Automation

Electrical installation portfolio from Hovag offers a broad range of smart building and home automation wiring devices, socket and switches.
In our showrooms we display a wide collection of wiring devices from Niko – Fontini – Simon Connect.
The customer can choose of this portfolio products that determine his own style and interior design that makes life at home and work exible, easier and meet the daily needs.

Smart Home

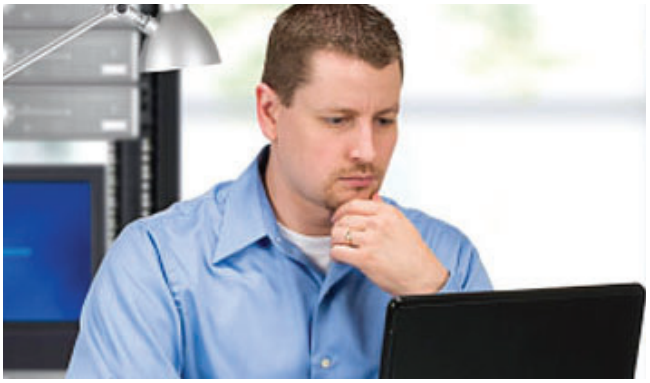

Hovag offers fully integrated control solution for Home and building automation.
Our supplies contain user friendly bus automation and wireless control automation from international suppliers.
Our vision is to equip homes with intelligent solutions that secure ultimate comfort, care, security for every life phase and personal needs of its residents.

The applications facilitate you to manage and control the lighting, heating, ventilation or roll-down shutters with ease. You can control these applications centrally by using touchscreens or smartphone but also by using traditional switches.

Technical assistance

Our technical sales team cooperates closely with architects, customers or electricians to offer them complete control solutions based on their specific application needs
This empowers our partners to offer in their projects a broad range of home control technology.

Reference Projects

Syrian Ministry Compound in Damascus

ACC main contracting company of the project relied on Hovag to have the complete package of Low Voltage power distribution system.
We assembled and supplied from Eaton Type Tested Low Voltage main and secondary power distribution system and control panels, the LV power transmission from transformers to the main power boards up to the chillers, we implemented by using Siemens Busbar Trunking System.

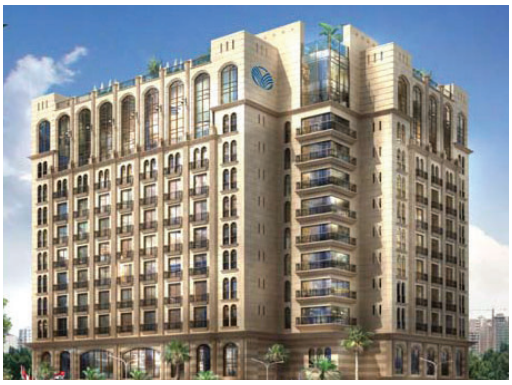

Syriatel Tower in Damascus

Hovag has provided complete lighting indoor and outdoor fixtures for the building along with Low Voltage power distribution system and control panels.

Yasmeen Rotana Hotel Damascus

From many competitors Hovag has been subcontracted by Arabtec construction Dubai to provide the power distribution system.
Our engineering team has been actively involved in the project with contractor and consultant to redesign load schedule.
Our supplies encompassed the Low Voltage main and secondary power distribution boards, motor control center and busbar trunking system.

Art house boutique hotel

In terms of architecture Art House boutique hotel is an eye catching ancient mill.
It combines ancient design of building with new luxury boutique decoration.
Therefore an efficient lighting system was required to illuminate every corner and space.
Our team has collaborated with the architect and Regiani to set every single fixture to accentuate beauty of the building and the displayed paintings and artefacts.

Reference Projects

National University Hospital

The largest hospital in Syria constructed in enormous building in 1982. Hovag has been involved in the engineering with the consultant to provide the low voltage power distribution and busbar trunking systems from Klockner Moeller Germany.

Sector Seven pumping station

Sector seven is an irrigation pumping station project consists of main and five pumping units 6KV along with a lift station to irrigate elevated areas. The project is located on the right bank of the Euphrates River in Al-Bukamal - Deir Ezzor countryside.
The project aims to rehabilitate and irrigate agricultural land for approximately 7,582 hectares, supporting over 10,000 farming families across eight villages.
The rehabilitation project, Sector seven, is being implemented in cooperation between the General Organization for Land Development, the United Nations Development Program (UNDP), and the Food and Agriculture Organization (FAO).

Hovag was awarded the contract to ensure efficient construction and operation.
To maintain a reliable power supply we provided the entire project comprehensive electrical system equipment from famous international brands, with engineering, procurement, testing and commissioning services for the entire pumping Stations that consists of:

- HV/MV substation includes a 66kV gas-insulated switchgear (GIS)
- 66/20 KV 10 MVA Oil-immersed power transformer
- 20 & 6 kV air-insulated switchgear (AIS)
- AC low-voltage switchgear and automation control system for managing the entire station
- Complete DC system consisting of batteries, battery chargers, and DC panels.

Reference Projects

Al Kalamoon University

The University of Kalamoon was founded in 2001 as the first private university in Syria. It is the largest university in the country that has a spacious campus with numerous buildings.
Since 2001 till now with the new ongoing buildings construction Hovag has been the sole supplier of low voltage power distribution system: switchgear, power boards, control panels and components for the buildings and the infrastructure of the project.

Trans Mall

One of the largest shopping malls in Syria constructed on space of 45000 m^2.
We have supplied the pool lights for parking area, outdoor and indoor lighting as well as the complete low voltage power distribution system.

Middle East sugar refinery

Middle East sugar refinery in the industrial zone in Homs is one of the biggest sugar manufacturer in the middle east with capacity of 1 million ton per year.
Hovag was regarded as highly reliable partner in this project. Our engineering team was involved from the first stages of the project and we have supplied the complete LV power distribution system and control panels for switching and protection.

Reference Projects

Albaraka Bank

Licensed by the Central Bank of Bahrain, Al Baraka Banking Group (BSC) is one of the leading Islamic banking companies in the world, offering its unique banking services to nearly one billion people in the countries where it operates.

Hovag has supplied both the bank headquarter in Syria and the main data center with the full power distribution system starting with the medium voltage switchgear, to the low voltage main and secondary power distribution boards, and ending with the uninterruptable power supply units UPS.

Al-Mouwasat University Hospital Expansion

Al-Mouwasat University Hospital was founded in Damascus in 1958. It is mainly composed of 4 major buildings.
The hospital's capacity is 820 beds with a working team consisting of 1700 doctors.
The customer was looking for a reliable, sustainable and safe power distribution. This is why they have chosen Hovag as an accredited supplier to provide and assemble the LV main and secondary power distribution switchgear, embedding Siemens Busbar Trunking system to run the energy from the main supplies sources to the major loads.

Batec Gypsum Board Factory

Batec has established a gypsum board factory in the industrial zone of Homs for manufacturing building finishing materials.
For this project, Hovag supplied and assembled the complete power distribution switchgear with all comprehensive control, protection and automation solutions.
Our engineering team designed the demanded technical solutions to keep higher levels of productivity and to distribute power safely and efficiently.

Reference Projects

Tal-Hassel pumping station

Tal-Hasel Pumping Station is a strategic facility located east of Aleppo. It forms a vital part of the region's irrigation water system, pumping at a rate of approximately 4m^3/s.
The station contributes significantly to improving the environmental landscape and supports agricultural stability by revitalizing farmlands. It plays a crucial role in irrigating approximately 8,500 hectares of agricultural land in southern Aleppo. Additionally, it helps revive the Queiq River and supplies the Sheikh Najjar Industrial City with around 1m^3/s of water.

The rehabilitation project of the Tal Hasel Pumping Station is being carried out in cooperation with the Food and Agriculture Organization (FAO).
Hovag was responsible for the supply, commissioning, and testing of the 20/6 KV substation components, which include a 20/6 KV 5MVA oil-immersed power transformer and 20kV air-insulated switchgear (AIS). The scope also covered pumping-related equipment, including 6KV air-insulated switchgear (AIS), control panels, and additional auxiliary systems.

Reference Projects

Some reference projects executed recently by HOVAG for supplying power distribution & control systems, Busbar trunking, Lighting and components:

Hospital projects

- National University Hospital
- Al-Mouwasat University Hospital Expansion
- Damascus Hospital
- Abasia Medical Center In Damascus
- Tartous National Hospital
- Harasta workers Hospital
- Damascus Hospital for Heart Diseases and Surgery
- Maart Al-Nu'man & Jsr Al-Shaghour Hospitals in Edlib
- Police Hospital in Damascus
- Aleppo university hospital
- SIUST University Hospital
- Hospital of Kalamoon University
- Digestive Specialized Hospital

Hospitality projects

- Yasmeen Rotana Hotel Damascus
- Art house boutique hotel
- Trans Mall in Homs
- Shahba Mall in Aleppo
- Qassion Mall - Damascus
- Kalamol Shopping Mall
- Town Mall in Aleppo
- Al-Nakheel village Tourism project
- Shahba Sham Hotel in Aleppo
- Regency Park Hotel in Bludan
- Monte Rosa 5 stars Hotel
- Damascus Gate Tourism project
- Hotel Royal Regency Aleppo
- Corel Julia Dumna hotel Aleppo
- Park Hotel in Aleppo
- Hotel Riga Palace Aleppo
- Shahba Rose restaurants in Aleppo

Industrial projects

- Sector Five pumping station in Deir Ezzor
- Sector Seven pumping station in Deir Ezzor
- Bab Al-Nayrab Pumping station in Aleppo
- Al-Harir Pumping station in Daraa
- Tal-Hasel Pumping Station in Aleppo
- Batec Gypsum Board Factory
